

HAWKESBURY PLUS

INTEGRATED SCREENING SYSTEM

Stylish Screening Solutions

Hawkesbury PLUS is the world's first integrated screening system and features all the proven benefits of ALSPEC's Hawkesbury Range, PLUS an integrated insect screening solution for aluminium multi-fold doors.

The issue of insect screening has long been a limiting factor to external door specification in the modern-day building and renovation industries. The desirability of uninterrupted views and unrestricted movement in the summer months often had to be balanced with the need to eliminate insects.

Finally there is a smooth-running, truly stylish screening solution for multi-fold scale openings, ALSPEC's Hawkesbury PLUS Multi-Fold Door Range E2 and E3, make such compromises a thing of the past. With the screen components integrated into the architecture of the door suite itself and the whole unit functioning so simply and reliably, Hawkesbury PLUS maximises use of your multi-fold door, whatever the season.

SINGLE SCREEN	DOUBLE SCREEN
3000mm (max height) then max width is limited to 2400mm	3000mm (max height) then max width is limited to 4800mm
3000mm (max width) then max height is limited to 2400mm	5700mm (max width) then max height is limited to 2400mm
